GCE Accounting (6002) Paper 01

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications come from Pearson, the world's leading learning company. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information, please call our GCE line on 0844 576 0025, our GCSE team on 0844 576 0027, or visit our qualifications website at <u>www.edexcel.com</u>. For information about our BTEC qualifications, please call 0844 576 0026, or visit our website at <u>www.btec.co.uk</u>.

If you have any subject specific questions about this specification that require the help of a subject specialist, you may find our Ask The Expert email service helpful.

Ask The Expert can be accessed online at the following link:

http://www.edexcel.com/Aboutus/contact-us/

Alternatively, you can speak directly to a subject specialist at Pearson about Edexcel qualifications on our dedicated subject Advisor telephone line: 0844 372 2187

Pearson: helping people progress, everywhere

Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Question Number	Answer	Mark
1(c)	FOR benefit of showing Net Current Assets (Liabilities)	
	Allows the user to see <code>clearly/easily</code> $\!$	

This enables the user to judge the net amount of liquid assets $$ If Net Current Liabilities, $$ then clearly the entity has a liquidity problem. $$	
and allows them to take action $$	
Helps potential investors $\sqrt{10}$ to make a decision whether to invest. $\sqrt{10}$	
Helps suppliers $\sqrt{1}$ make a decision concerning possible credit to be given. $\sqrt{1}$	
AGAINST benefit of showing Net Current Assets (Liabilities)	
Net Current Assets only shows an amount in a monetary value. $$ This does not show if this amount is sufficient. $$ The amount required would be affected by the entity's size $$ and industry. $$	
More useful measures of liquidity are the Current Ratio $$ and Acid (Quick) Ratio, $$	
These could be calculated $$ using either of the two formats. $$	
It may be better to show all the monies put into the entity $$ on the same side of the Statement of Financial Position / Balance Sheet ie Total Equity and Liabilities. $$	
Maximum of 8 marks for arguing one side only.	
Evaluation: It is / is not necessary to show Net Current Assets (Liabilities) on the Statement of Financial Position. $\sqrt[]{}$ (2 marks for Evaluation).	(12)

Number					
3(d)	Rowl	ands plc Sundry Shareholders A	ccount		
		Atlantic Foods / 36 000 000 /	Share capital	20 000 000 /	
		(Purchase Consideration)	Profit + Loss reserve	4 900 000 /	
			Profit on Realisation / J	11 100 000 55	
		36 000 000		36 000 000	(8)

Question Number	Answer	Mark
3(e)	Answers could include :	
	Goodwill will appear in the balance sheet of Atlantic Foods plc as an intangible asset \mathcal{J} , under the heading of Non-current assets. \mathcal{J} Correct treatment of goodwill would be to amortize \mathcal{J} over its useful economic life. \mathcal{J} Likely to derive benefits from the expenditure over a number of years, \mathcal{J} so spread the cost of this expenditure over a number of years \mathcal{J} ie matching concept \mathcal{J} gives a True and Fair view of the accounts. \mathcal{J} To write off immediately may make profit unrealistically low, \mathcal{J} and tax charge would be unfairly low. \mathcal{J} In line with recommended practice \mathcal{J} ie FRS 10 \mathcal{J}	(4)

Question Number	Answer	Mark
3(f)	Answers may include : Maximum of 8 marks if argument is one-sided.	
	Case FOR takeover : Atlantic Foods may improve in the future \mathcal{I} and the share price could rise above £1.66. \mathcal{I} This will give Atlantic Foods a foothold/start or greater presence \mathcal{I} in UK. \mathcal{I} Atlantic Foods may benefit from economies of scale \mathcal{I} and make more profits. \mathcal{I} Likelihood of dividends in the future. \mathcal{I} Investment may be more secure \mathcal{I} as business is now enlarged. \mathcal{I}	
	Case AGAINST takeover: Goodwill paid is very high \int - about 60% \int above net asset values. \int Atlantic Foods may suffer from diseconomies of scale \int and see profits reduced. \int Atlantic Foods has to pay out a large amount of cash \int (£9 440 000) \int which will	
	have a negative effect on liquidity. \int Issue of more shares \int will see value of Atlantic Foods shares fall. \int and $/$ or less dividends per share \int and $/$ or reduction in voting power \int Conclusion 2 marks available Should relate to points made above.	(12)

Question	Answer	Mark
Number		
4(b)	For Method	
	Narayang may have little choice in method as terms may be decided by supplier(s) $$ who may be in a strong position $$ especially as Narayang are a new business. $$	
	Narayang may be able to negotiate better terms in the future, $$ especially if they prove to be a regular customer, $$ and/or a reliable supplier. $$ After the first two months, $$ cash flow will be regular, $$ with receipts of	
	£25 632 and payments of £12 600 for supplies. $$	
	Discounts could be given for prompt payment $$	
	Against Method	
	Firm is waiting longer to collect sales receipts than they are taking to pay suppliers. \checkmark	
	This gives a simple working capital cycle \checkmark of one week. \checkmark	
	Negative effect on cash flow $$ in the first two months of business. $$	
	Selling on credit may result in bad debts $$	
	Maximum of 4 marks for arguing one side only	(8)
	Evaluation:	
	Method is good/bad $\sqrt{}$	
	2 marks available for overall conclusion, should relate to points made above.	

Question Number	Answer			Mark
5(a)	Gearing ratio =	<u>Debt</u> x100 √ <u>OR</u> Capital Employed = <u>24 000 000</u> √ x 100 40 000 000 √	<u>Debt</u> x 100 √ Equity <u>24 000 000</u> √ x 100 16 000 000 √	(4)
		= 60% <i>J</i>	OR 150% √	

Question Number	Answer	Mark
5(b)	 The gearing ratio is too high, J being over 50% (100%). J O/F It would be better if the ratio were between 30% and 50% J It could be improved by (max of two JJ): issuing more ordinary shares Redeeming preference shares Paying off bank loan Redeeming the debenture Making more profit and keeping it in reserves. 	(4)

Question Number	Answer	Mark
5(c)	(i) Earnings per share = $\frac{\text{f}400\ 000}{10\ 000\ \text{J}}$ = 4 pence per share J 10 000 000 J	
	(ii) Price/earnings ratio = $\frac{120}{4} \int = 30$ times O/F $\int \frac{120}{4} \sqrt{10}$	
	(iii) Dividend cover = $\frac{400\ 000}{280\ 000}$ \int = 1.429 times \int	
	(iv) Dividend yield = $(2.8 \times 100) \ J = 2.33\% \ J$ £1.20 $\ J$	(12)

Question Number	Answer	Mark
5(d)	 (i) EPS is low ∫ (relating to own figure) (ii) Price/earnings ratio is fairly high ∫ (relating to own figure) (iii) Dividend cover is acceptable ∫ (relating to own figure) (iv) Dividend yield is acceptable in today's market / low ∫ (relating to own figure) 	(4)

Question Number	Answer	Mark
5(e)	The ratios could be improved by: EPS - increasing profits \int or redeeming ordinary shares \int Price/earnings - raising share price \int by increasing profits \int or	
	redeeming ordinary shares \int Dividend cover - increasing annual profits \int or paying a lower dividend \int Dividend yield - paying a higher dividend, \int after making higher profits \int	(8)

Question Number	Answer	Mark
6(a)	Answers may include : For product, obtain a product specification \int giving standard quantities for materials and labour \int Standard prices for materials obtained by consulting buyers and suppliers \int Standard labour rates obtained by consulting human resources department and/or unions. \int Standard overheads obtained \int by consulting management / finance department. \int Looking at figures for past cost of sales \int	(4)

Question Number	Answer					Mark
6(b)		BUDGET	ACTUAL	VARIANCE		(9)
	Sales	96000	94800	1200	ADV J	(8)
	Less					
	Material Costs	26990	27840	850	ADV 🗸	
	Labour Costs	32640	33660	1020	ADV ∫	
	Variable Overheads	17970	15635	2335	FAV ∫	
	= Cost of Goods Sold	77600	77135	465	FAV 🗸	
	Gross Profit	18400	17665	735	ADV 🗸	
	Less Fixed Overheads	14430	14430		0 /	
	Net Profit	3970	3235	735	ADV 🗸	

Question Number	Answer	Mark	
6(c)(i)	Labour Efficiency Variance = (Actual Hours - Standard hours) $\int x$ Standard Rate \int		
	= $(3250 \int - 3200 \int) \times 10.20 \int$		
	= £510 Adverse √ o/f		

Question Number	Answer	Mark
6(c)(ii)	Labour Rate Variance = (Actual Rate - Standard Rate) $\int x$ Actual Hours $\int = (\pounds 33\ 660\ \int - \pounds 10.20\ \int) x\ 3250\ \int 3250$	(6)
	= £510 Adverse √ o/f	

Question Number	Answer	Mark
6(d)	Evaluation Answers may include. FOR usefulness Allows performance to be compared \int with predetermined standards. \int Variances can be analysed \int and action taken to control costs. \int Helps eliminate waste, \int idle time, inefficiency etc \int Allows management by exception, \int which sees action taken only for large variances. \int	
	AGAINST usefulness Takes time, expertise \int and money to prepare. \int Inaccurate standards set \int may be misleading and unhelpful. \int Maximum of 4 marks for one-sided argument.	
	Conclusion Standard costing is useful <i>JJ</i>	(8)

Question Number	Answer	Mark
7(a)	Profit is equal to total sales revenue \int less total costs. \int Margin of safety is equal to actual sales revenue \int less sales revenue required to break even. \int OR actual output / sales units \int less output / sales to break even \int Therefore, the two are not the same. $\int \int$	(6)

Question Number	Answer		Mark
7(b)	Fixed Costs	Variable costs per unit	(12)
	Rent £360 per month \int Depreciation £50 per month $\int \int$	Total £0.75 per unit ∫	(12)
	Insurance £42 per month \int Electricity £60 per month \int	Contribution per unit	
	Total FC £512 per month /	$(\pounds 3.95 - \pounds 0.75) \int = \pounds 3.20 \int$	
	Break Even Point = $\frac{\text{f512}}{\text{f3.20 o/f}} \int = \frac{1}{5}$	160 meals o/f √	

Question	Answer		Mark
Number			
7(c)	Profit for year	Contribution (3.20 x 6 200) = £19 840 o/f JJ Less FC (12 x £512) = £6 144 o/f JJ Profit = £13 696 J O/F J C	(6)

Question Number	Answer	Mark
Number 7(d)	Case for easier control of FIXED costs. It is possible to decide the length of life of a non-current asset, \int thus controlling the depreciation charge per year. \int It may be possible to negotiate with the landlord \int to fix a monthly rent charge. \int It may be possible to negotiate with the bank \int over the interest rate charged on a loan. \int Fixed costs do not change with output but variable costs do \int Case for easier control of VARIABLE costs. It is possible to fix direct wages, \int and someone will be willing to work for this rate. \int It may be possible to negotiate with suppliers \int for the price of raw materials. \int Some fixed costs maybe impossible to change eg loan interest/repayments \int , business rates \int , depreciation \int , insurance \int (one tick per item up to a maximum of two ticks) Maximum of 4 ticks for arguing one side. Conclusion - Two $\int \int$ It is easier to control fixed / variable costs.	(8)
