PAPER 1R

You must have: Ruler graduated in centimetres and millimetres, protractor, pair of compasses, pen, HB pencil, eraser, calculator. Tracing paper may be used.

Total Marks

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided
  – *there may be more space than you need.*
- **Calculators may be used**.

Information

- The total mark for this paper is 100.
- The marks for **each** question are shown in brackets
  – *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.
- Without sufficient working, correct answers may be awarded no marks.

Answer ALL TWENTY NINE questions.

Write your answers in the spaces provided.

You must write down all the stages in your working.

1 Without using a calculator and showing all your working, evaluate

$$3\frac{3}{4} \div \frac{5}{8}$$

Give your answer in its simplest form.

4 All the people at a meeting were asked where they had been for their last holiday.
All the people gave one answer.

Elton recorded the continent of each person's answer.
Elton drew an accurate pie chart for his results.

Elton's results showed that 40 people had been to Europe for their last holiday.
The angle in the pie chart for Europe is 64°

Calculate the number of people at the meeting.
