Additional information

The directors hope to increase demand by improving the product.

The following information is available.

- 1 Current production of the original product is 7200 units per month. This represents 90% of normal capacity.
- 2 Direct materials will cost \$3 per kg for the improved product. Each unit of the improved product will require 15% more material.
- 3 The selling price of the improved product will be \$65.
- 4 It is expected that monthly production will increase by 20%.
- 5 The factory can operate in overtime conditions. Direct labour is paid 1.5 times the normal rate in overtime conditions.
- 6 An additional machine costing \$40 000 will be required. Non-current assets are depreciated by 15% per annum.

Additional information

At a **second** factory the company manufactures **another** single product type. The following information is available.

	\$
Direct material per unit	13
Direct labour per unit	11
Other variable costs per unit	3
Selling price per unit	42
Fixed costs per week	12 000

The factory uses 10 machines, each producing 300 units per week. The directors are aware that problems have arisen with 4 machines which require urgent repairs. These machines will be taken out of production for 8 weeks.

The directors are considering **two** options.

Option A: Buy in goods

The goods will be provided by an overseas supplier at \$34 per unit.

Total delivery costs of \$4200 for 8 weeks will be charged.

The supplier can only provide 75% of the lost production.

Option B: Hire replacement machines

Only two replacement machines are available at a cost of \$150 per machine per week.

The machines will only be available for 7 weeks.

Staff will require training on the replacement machines at a **total** cost of \$700.

REQUIRED

(e) Calculate the profit for the 8 weeks for each option.
