MARK SCHEME

Maximum Mark: 150

---

**Published**

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2017 series for most Cambridge IGCSE<sup>®</sup>, Cambridge International A and AS Level components and some Cambridge O Level components.

1(d)	<p>The club will receive one-off payments from members, however in accordance with the matching concept, this should not be credited in full to the income and expenditure account as it is not earned in the period received.</p> <p>The income should therefore be spread over an appropriate period to match funds received with the benefits provided to members.</p> <p>The payments received will be represented as a credit in the statement of financial position as deferred income.</p> <p>The club should transfer amounts to the income and expenditure account from the deferred income account in equal instalments over a period it can determine as reasonable.</p> <p>This may depend on the profile of the members and expected use, but should not be for a lengthy period of time.</p> <p>As the lifetime fee is \$400 and the normal annual membership is \$50, it might seem appropriate to transfer the amounts in equal instalments over 8 years.</p> <p><b>(1 mark)</b> for each valid point to a max of 4 marks.</p>	<b>4</b>
