[3]

Additional information

At one of its sites the company specialises in printing brochures and leaflets for local organisations. At this site it uses a system of absorption costing.

There are two production departments: Assembly and Printing and two service departments: Technical support and Personnel.

The following information is available.

	Production departments		Service departments	
	Assembly	Printing	Technical support	Personnel
Floor area (square metres)	90	70	15	5
Power (kilowatt-hours)	120	320	40	20
Replacement cost of machinery and equipment (\$)	105 000	30 000	12 000	3 000
Number of employees	20	15	5	
Technical support hours	400	60		

The following budgeted overhead costs for August 2019 are still to be apportioned.

	\$
Electricity	20 500
Insurance of machinery	7 500
Insurance of buildings	11 880

REQUIRED

(b) Complete the following table to show the apportionment of budgeted overhead costs for August 2019.

Apportionment of overheads

	Total \$	Production departments		Service departments	
		Assembly \$	Printing \$	Technical support \$	Personnel \$
Overheads already apportioned	40 210	17 530	11 360	5 020	6 300
Electricity					
Insurance of machinery					
Insurance of buildings					
Total overheads apportioned					
Reapportionment of personnel overheads					
Reapportionment of technical support overheads					

[7]

Additional information

The following budgeted information is also available for August 2019.

	Assembly	Printing
Direct labour hours	3200	2000
Direct machine hours	1400	5500

REQUIRED

(c) Calculate an overhead absorption rate for **each** production department using an appropriate basis.

.....

.....

.....

.....

.....

.....

.....

.....

..... [4]

Additional information

The company received an order for a set of brochures to be produced in August 2019. It was budgeted that this order would require the following:

Direct material and labour cost	\$1330
Direct labour hours	
Assembly department	12.5 hours
Printing department	7.2 hours
Machine hours	
Assembly department	5.5 hours
Printing department	6.0 hours

The company requires a profit margin of 25% on all orders.

REQUIRED

(d) Calculate the budgeted profit on this order.

.....

.....

.....

.....

.....

.....

.....

.....

.....

..... [4]

Additional information

The actual time taken in each production department for this order was as follows:

	Assembly department	Printing department
Direct labour hours	11	6.5
Machine hours	6	8

REQUIRED

(e) Calculate the **total** over or under-absorption of overheads **for this order**. Clearly show in your workings over-absorption or under-absorption of overheads in **each** department.
